The division into short-ears and long-ears is a division between two groups of the same people. The evidence in favor of this statement is from a small "takau rongo-rongo" text deciphered by the author. This text is inscribed on the small Chile tablet and represents a genealogy consisting of six names. (Author) (Social Systems, ITT, v. 8, no. 11)</p>	<p>61-31223</p> <p>I. Batinov, N. A. II.
